EDUCATION

FERI -
Computer
Science and
Information
Technology
Student

ACHIEVEMENTS

- Three times among the best in the country in mathematics (1st place, 3rd place and silver award)

- Winner of the silver award at the national research competition

- Awarded for being one of the best students of his generation by Elektro Maribor

PROFESSIONAL

AREAS

- Web applications
- Servers
- Backend systems
- Real-time systems

SUMMARY

I've been involved in computer science since I was a little girl. It started with small projects, but my first major project was a research paper where I built a realistic model of a local elementary school in a 3D world using JavaScript code.

Nowadays, I focus mostly on unified solutions with web applications, servers, and process automation. Among other things, I was among the best in the country in mathematics three times, which I use to advantage in all my computing projects.

EXPERIENCES

Web developer | InteractIdeas.pt | Internship

October 2023 – November 2023

- I did practical training abroad for 1 month.
- As part of this, I helped develop a website that allows teachers to prepare learning units using artificial intelligence.
- I learned about working with databases, artificial intelligence, and developing uniformed solutions
- I also learned how to work in a team with other developers.
- I used technologies such as PHP, Django, React, Vite, MySQL

Web developer | Independent work

October 2025 – present

- I have worked with various companies and developed web solutions for them according to their needs.
- I automated their processes (e.g. sending quotes...)
- I actively manage these online solutions, updating them to the latest standards and upgrading them as needed.
- All my web solutions score 90+ on Google PageSpeed Insights performance and SEO optimization tests.
